XFT Products for Accounting

It pays off

Efficient financial processes with the highest level of compliance

Do you want to manage your accounting efficiently and speed up processes, but you just don't know how? The flood of invoices in a wide variety of formats means that your processes are complicated and confusing? Then you have found the right solution!

With XFT's products, you can control your entire processes transparently and efficiently in your SAP system. In an easy-to-use interface that your team loves to work with, in just a few clicks. From outgoing invoices in SD, to those in FI with automatically generated PDF, to incoming invoices in MM and FI. Of course, all of this can also be done directly as an electronic invoice, e.g. in the German X-invoice formats. This is how you master the daily work in accounting with SAP and XFT.

With XFT Financial Suite 4S4 you are able to:

- ✔ Efficiently map the entire invoice processes (outgoing and incoming) and accelerate them accordingly.
- ✔ Comply with legal requirements regarding electronic invoices, e.g. German XRechnung and ZUGFeRD.
- ✔ Send (electronic) invoices faster and at the same time reliably take advantage of opportunities – such as cash discounts.
- ✔ Work more efficiently in a team, e.g. by leveraging mobile approval workflows.
- ✔ Log changes completely and document them in a legally compliant manner.
